

VOLUNTEERS CODE CLUB NEEDS YOU!

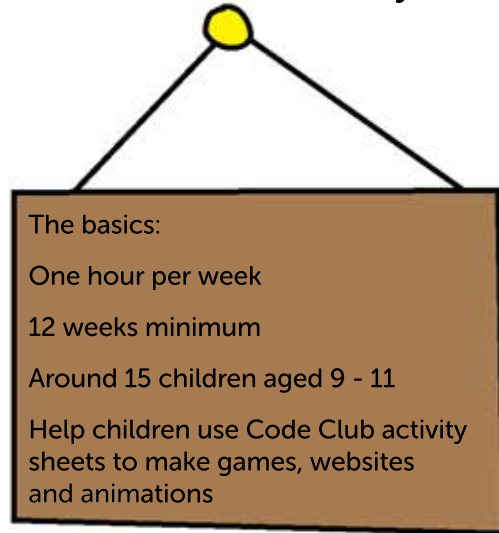

Code Club UK is a nationwide network of volunteers and educators who run free coding clubs for children aged 9 - 11. Volunteering with Code Club is a hands on way to develop coding skills and help the local community.

Plus, it looks great on your CV!

To volunteer at Code Club you need to:

- Be available for one hour a week to help with a Code Club session in a local school, library or community venue
- Commit to volunteering for at least one school term (12 weeks)
- Be willing to undertake a DBS check
- Collaborate with the contact at the venue to help the club run smoothly
- Prepare for the Code Club session each week. This includes organising resources and completing the project you will be doing with the children in advance

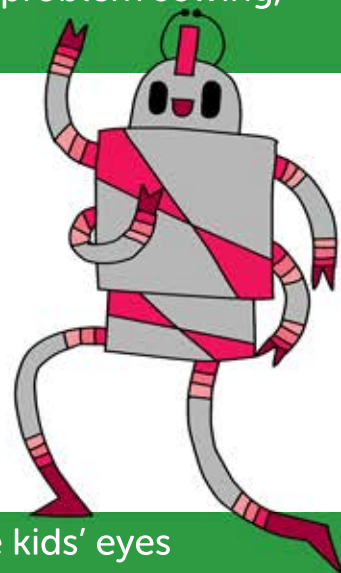

You don't have to be a coding genius, most clubs start with simple programs like Scratch, and you can learn alongside the children

You'll play a key part in helping children gain skills that are useful to them - not only learning to program, but also learning about computational thinking, problem solving, planning, designing and collaboration.

How Code Club support you:

- We guide you through your DBS check
- Someone from the venue will be with you in the sessions
- We provide great projects for the children which are step by step guides for creating games, animations and websites
- Free online or face to face training sessions to get you started

"I think Code Club is brilliant, and my favourite moments are when the kids' eyes light up when they get something right, or they have a new experience with technology that is fun and creative."

Elbrie de Kock, Code Club Volunteer
